

Exhibition / Display Spaces

The Main Exhibition Space is a purpose built gallery space of 128m². This space is generally booked up to 12 months in advance. To enquire about being part of the annual exhibition program, please submit your enquiry to us.

Room sizes

The Main Exhibition space can be scaled up or down.

The larger space is 10m x 9.6m.

The smaller space, the Project Gallery Space, is 3.3m x 9.6m.

The two spaces are separated by large, pivoting, wall-panels. For major exhibitions you can book both spaces.

Hanging system

The perimeter walls can be hung to 4M, with plasterboard over structural plywood. The main space is equipped with ten movable gallery panels of 2m x 4m, which are permanently suspended on a track system that enable a wide variety of configurations. The larger space is suitable for group shows and larger exhibition proposals, whilst the Project Gallery Space is best suited to small solo shows or experimental, work-in-progress showings or single video installations.

Lighting system

The Exhibition spaces are served by a standard track mounted ERCO gallery lighting system with both spots and floods. Natural lighting is available through polycarbonate panels above the wall line that can be covered with a blind system if natural lighting is not desired. A metal grid at the 4M level holds the movable panels and allows for hanging of artworks and mounting of projectors, speakers and other attachments if required. The grid also has power outputs at regular intervals. The floor is polished concrete with standard power outlets inset into the floor, and also at the base of the walls.

Equipment

The gallery is equipped with two data projectors and a flexible sound system.
